2.3_exercises

January 6, 2018

Write a program with the following variables. Check if each one is greater than 100, and print a message if it is true. The, print the variable to confirm you're corrent.

```
In [12]: x = 5 ** 5

         y = 5000/19

         z = 100
```

Check to see if the length of any of these snippets exceede 30 characters:

```
In [13]: sent1 = "It was a bright cold day in April, and the clocks were striking thirteen"

         sent2 = "Call me Jonah. My parents did, or nearly did. They called me John."

         sent3 = "The King stood in a pool of blue light, unmoored"

         sent4 = "All this happened, more or less"
```
